No Cheque For Amount Yet.

Order Day, N.Y., Aug. 2.—After a conference of six hours with President Roosevelt at Sagamore Hill today, Attorney-General Bonaparte sat on leaving, while many matters with which his department had to do had been thoroughly considered, none of them could be discussed for publication. "Yes, we talked about the Standard Oil," he replied to a question. "No one has sent me a cheque yet for the twenty-nine million dollars fine. However, that litigation seems to be progressing satisfactorily."

HARVEST FINE BUT SOME WEEKS LATE

An Excellent Yield Expected and Already Farmers are Troubled About Help.

Winthrop, August 8.—Crop report received today are again of a very favorable character, and these scarcely a complaint from any point on the road. Many of the agents now speak of the commencement of harvest, and it is likely that it will be general within the next few weeks. On the whole, judging from this report, the yield generally will be better even than previous reports have indicated.

Harvest a Month Hence.

As a general rule, the harvest will be generally about one month from date. Portage-la-Prairie reports "Wheat filling well and with a continuation of the present warm weather a good yield is assured." Portage la Prairie predicts that the yield in that district will be superior to that of last year. The other stations all give favorable reports of a general character. On the Manitoba section the report shows that the conditions have improved wonderfully during the past week. At Mank the wheat cutting will commence in three weeks.

Crops a Little Late.

The reports from the Emerson section are also of a favorable character, and the only drawback spoken of is that the crops are a little late. The weather conditions in the Neepawa section have also been favorable. During the first half of the week it was very warm, with good rains. As a result the grain is filling out well. Harvest will be well started three weeks from date. The average wheat yield there will be twenty bushels to the acre.

Went Farm Help.

Reports from Prince Albert are of a general character, but without exception are favorable. From the Saskatchewan and Victoria section reports it is shown that the prospects have continued to improve during the past week. Despite the fact that in some regions of Manitoba the crops are not so favorable as in other years, the number of applications

STRATHCONA NEWS

LOCALS.

Miss Bell, of Strathcona, has been the guest of Mrs. Denney, Red Deer, for the past few weeks.

Rev. Donald McIntyre and Mrs. McIntyre, Pincher Creek, are in the city visiting Rev. Mr. and Mrs. Brown.

Miss Jessie Cameron, a popular singer, will sing two solos on Sunday night at the sacred concert to be given in the Thistle rink.

The sacrament of the Lord's supper will be dispensed at the Methodist church tomorrow morning. Rev. T. J. Johnston will officiate.

S. T. Holbrook has sold out his interests here to H. Deane, of London, Eng., and leaves shortly with his family for the Pacific coast.

Mrs. David Grant, Collingwood, Ont., with her two sons and one daughter, have arrived in the city to take up their residence here.

Judge Tipton has gone to Calgary to attend a meeting of the Advisory Board of the Knights of Pythias for Alberta, of which he is the chairman.

The Strathcona Fire Brigade has appointed a committee to meet the city council at next meeting, and discuss the reduction of the salary of the brigade tender.

John Hollow, who has some time been staying at the Windsor hotel, Strathcona, was yesterday taken ill and found to be suffering from appendicitis. He is now at the Strathcona hospital.

The city council have been figuring up the estimates this week in order to start at the first of September. A set complete yet nor have the expenditures of the last year been deducted as yet from the assessment. The rate, however, is likely to be 10

which are being received for farm help at the provincial immigration offices are daily increasing, and the requests are already as great as they have ever been at a similar period either last year or the year before.

No Men for Vacancies.

The same shortage of farm help is apparent this year as previously, and the difficulty of procuring assistance from rural points will be much greater, nevertheless, at the present time it is with the utmost difficulty that the present needs are satisfied. While it is yet impossible to say how many will be required to harvest this year's crop it is felt that the number of men who will be needed to aid in the work will be as great as ever, as the crop situation in Saskatchewan and Alberta is reported to be excellent.

Requests to counter from the Far West for help, and already a number of points have made special arrangements with the C.P.R. in order to send men to the necessary help.

At present at the offices of the provincial immigration building the requests for 150 men to be sent immediately, and there are no available men to fill the vacancies.

mill, which includes the school taxes. An interesting feature has been the fact that the electric light plant is paying expenses when the city is obliged with the cost of the street lights.

The repairs on the grandstand pavements laid last year, which are now in progress, are being done at the expense of the contractor, Mr. W. J. Carter, of Edmonton. When the work was being done the contractor gave bond that any necessary repairs should be executed free of cost this summer. Accordingly the city engineer has gone over the work and wherever the squares have been cracked or shod hollow they have been replaced, and are now being replaced.

NEED OF CHILDREN'S AID.

The necessity of a Children's Aid society has on several occasions this week been brought forcibly to the attention of the police authorities.

Several days ago a young lad of thirteen named May was before the court on a charge of stealing a cheque from the post office and afterwards forging an endorsement. This is his second appearance within a brief period from the post office and the supreme court and have him afterwards branded as a forger, he was released.

Yesterday Chief Beale had two little girls, aged fifteen and ten respectively, whose mother was dead and whose father had neglected to provide for them, owing to his intemperance. There was no means of keeping them except at the city's expense. The unsavory thing they were doing the education and can that they would receive in an institution for children, similar to many in the east.

troubles of last winter on the Canadian Northern, came to the city this morning and are registered at the Alberta.

They have just returned from Vancouver, where an audit sitting of the Commission was held, and practically all the business that that body at the coast was finished up.

Today the railway experts will hold a meeting with the C.N.R. people and the Montclair coal mine owners with reference to the prohibition order recently issued by the Commission against the use of lignite fuel. Their meeting here is a result of the action of the local government through Attorney-General Carter in calling attention to the hardship attending upon a prohibition of the use of lignite coal in the engines of the Canadian Northern.

Afterwards Mr. Mountain will meet the Canadian Pacific officials and go over the question of the location of the C.P.R. line from Teah to Sixteenth street, in the west end of the city.

This afternoon, in company with Mr. Van Aelst, chief divisional engineer, an inspection of the Clover Bar bridge.

Speaking to the bulletin this morning, the Railway Commission expert stated that the Commission at their recent meeting in Winnipeg had agreed to confirm the proposed location of the G.T.P. line in accordance with the rights given them by the city of Edmonton. Today he will endeavor to arrange with reference to the C.P.R.'s application. Mr. Mountain is determined, if possible, to arrange between the companies that each shall have an advantage of all switching privileges that the other possesses, thus benefiting the city at large to the greatest extent possible also be railway companies interested.

OFFICIAL KNOWLEDGE OF LAW-BREAKING.

The really important feature of the Tarnan-Macouly report is not the direct result but the side-light that is thrown upon the attitude of the city government toward the disorderly houses in certain parts of the city. That these institutions have existed practically uncontrolled by the city authorities is common knowledge; and the testimony of both parties in the recent quarrel, is evidence that they exist with the knowledge and consent, if not under the understood protection of the city officials. If the alleged inspection was made the alderman who made it knew of the existence and character of the resorts; if the medical health officer protested against the inspection he too knew of their existence; when the matter came before the commissioners they became cognizant of it not before that the same were in operation; and when the question was threshed out in council the aldermen became acquainted with the fact that they did not know it previously. The city officials from the aldermen up or down, therefore knew and admit the existence of these resorts within the limits of the city, and the public know that they know it. Whatever else the mis-do or did not do it proved beyond question that the resorts exist within the city by the knowledge and therefore with the consent of the city officials. And certain details which came to light indicate that the keepers have very clear understanding of the attitude of the officials toward them. Indeed if they had not such understanding the offences would be singularly lacking in observation. These things are known to the public and are known to be known to the city authorities. They can neither be denied nor can the officials assume ignorance of them. This is the really important public outcome of the scurrage.

Who is responsible for this condition of affairs? Has the city council laid down a policy of toleration or is it not? It is not on the records that they have authorized or directed any such course. Had they done so the responsibility would have rested upon the aldermen and they would have been answerable to the ratepayers for the wisdom or folly of that policy. But no such policy has been determined on nor apparently any plan. In the absence of such policy the handling of this troublesome question rests with the city commissioners and under their instructions, with the police department. Their best judgment has apparently been to let an existing evil continue—and to tolerate evils always do. Aside from occasional raids no determined attempt has been made to clear out the nuisance, nor any sustained effort to abate it. Meanwhile the conditions under which the evil arose and was formerly tolerated, have changed. The districts in which the houses are located, a few years ago isolated and unpolluted, have been settled upon. Lots have been sold at greatly increased prices and frequently to strangers who knew not of the neighboring nuisances. Houses have been erected and families by scores now live in these formerly isolated districts. Is it fair that the peace of these families should be disturbed and the value of their property depreciated by permitting the continuance of these despicable resorts? Apparently the commissioners and the police department think so. If the aldermen do not move now they will be judged as thinking so too. If the ratepayers think differently they should bring pressure to bear on the aldermen. The time to do so is now when neither the existence of the institutions nor the official knowledge of their existence can be denied.

A PROVINCIAL EXHIBIT.
The gratifying announcement is made that the Provincial Government will send an Alberta exhibit to the Toronto exhibition and the Dominion Fair. The former is to be held from Aug. 20th to Sept. 2nd, the latter from Sept. 20th to the 14th at Sherbrooke, Quebec. Mr. E. L. Richardson, of Calgary, will have charge of the exhibit and already has it under preparation. The exhibit is thoroughly provincial in character.

Every district and every class of product should be worthily represented, that the whole may convey to the observer an adequate impression of the wide range of Alberta's resources and the comparative capabilities of the various sections of the Province.

ROCKEFELLER'S CHARGE.
With that \$30,000,000 fine fresh in memory Mr. Rockefeller should make a hit as a shock during the coming theatrical season. Fancy him addressing Judge Landis, impersonating The Duke—
"Nay, take my life and all; pardon not that!
You take my honor when you do take the prop
That still sustain my house; you take my life.
When you do take the means whereby I live."

BADLY TANGLED.
Discussing the full supply question the Winnipeg Free Press classes Central Alberta coal with the lignite found elsewhere in the West and asserts that it "cannot be stored, being 'rotten' the past stage, and therefore liable to become mere pulp on exposure to rain." The conclusion is about as erroneous as the statement is tangled. That Edmonton coal and all other kinds of coal will rapidly deteriorate if exposed to rain and all other climatic eccentricities is true; but it is also true that coal when "rotten" is not exposed to these destructive agencies. When "rotten" and therefore not exposed to rain and other climatic conditions Edmonton coal may be kept for months without seriously impairing its heating quality. The fault lies not in the coal, but in the Free Press' idea of "storing" coal.

ON THE SIDE.
Canadian Courier: "The hardships of the West are such as can be conquered with a laugh." Perhaps so, but we pin our faith to the grub-buck.

A St. Petersburg despatch says: "The opinion is gaining ground in military and other circles that Russia will have no use for a fleet except for coast defense." And it took them two years to discover that!

"Does anyone deny that storms will arise from the Orient?" demands the Winnipeg Telegram. Well if the allusion is to the oriental silence of the Telegram about the Geo. W. Woods affair, we humbly plead guilty to a doubt.

Mail and Empire: "Canada is waking up to the value of its own resources, and the money now lying in the banks will be put in the 'channel' which have made so many American millionaires." But the trouble seems to be that the money is not "now lying in the banks." According to some authorities it has already gone through the Wall Street channel which has "made so many American millionaires."

THE FUEL SITUATION IN WESTERN CANADA

Manitoba Free Press Reviews Situation From Reports Secured From Correspondents. Country Points are Not Laying in Adequate Supplies. Wood is Scarce and Dear.

The question of an adequate fuel supply is one in which all of Western Canada generally and Manitoba in particular are interested, and already the public are manifesting anxiety concerning the situation, with which they are coping during the coming winter. In view of this general interest the Winnipeg Free Press has endeavored to present a reasonably complete picture of the actual position of affairs.

It is evident from the facts presented here that the country as a whole is face to face with a situation the seriousness of which will be apparent upon careful perusal. There is little probability of a fuel famine as such as that which afflicted western Canada, and indeed the entire continent, last winter, but it is evident that a scarcity may be anticipated unless prompt action be taken to guard against it. There is still time to protect even the most intricate sections of the country against the possibility of suffering if the necessary steps are taken before the transportation facilities become congested with the movement of fuel.

It is evident from reports received by the Free Press that the severe losses sustained during the winter of 1934 have not caused preparations to be made to guard against a similar situation. Across the border in the winter states the fuel famine is already causing hardship. There the coal deposits covering an area of 60,000 acres owned by the mines because of the withdrawal of the coal lands from public entry due to the criminal prosecution for public lands fraud, the district state's attorney sent out from Butte, Montana, at the request of people who may be financially interested in the development of coal lands, but who probably do not exaggerate the need of coal, describes the conditions as follows:

The Northern Pacific in Montana is obliged to burn Hocking Valley (Ohio) coal, notwithstanding the fact that the company has made considerable efforts to secure additional local supplies. A Spokane newspaper has obtained for 200 cars, but has been unable to secure any. It is difficult to get any coal from Canada, and the Canadian government forbids export of Canadian coal until home demands are filled. Nearly all the northwest coal mines are running dry tonight but are all away behind their orders. A great shortage exists on the Pacific coast. The government has been obliged to order 50,000 tons sent from Baltimore to the northwest on the Pacific coast.

While the people of Montana, Wyoming, the Dakotas, Washington, Oregon, Idaho, Utah, Arizona, Nevada and California are all suffering from the coming winter is a serious question. Long ago, the authorities were warned that the coming winter would have a 40 per cent shortage of coal, but if looks like a 100 per cent shortage has already arrived. All the railroads are largely out of their train service and are constantly consuming more coal. While the St. Paul is finished to Seattle they will require 5,000 tons per day for railroad use and the same for new towns and villages springing up along the new mileage. The Burlington is building 500 miles of extension, and the Northern Pacific is double-tracking a large amount of it line, besides the Great Northern and the Union Pacific extensions, all which will add largely to the consumption of coal for railroad use. The great copper country, now being finished at Ely, Nevada, will require the total tonnage of several millions, and the immense mining activities throughout Nevada and Arizona must be supplied from the same source.

It is stated that while good bituminous coal can be bought for from \$3 to \$3.50 a ton in Chicago, Pittsburgh and New York, it costs anywhere from \$10 to \$20 a ton in San Francisco. Lignite coal at Butte, Montana, is sold at from \$7.50 to \$8.50 a ton at Butte.

Canada Better Off. Western Canada, perhaps, is in a better situation, because it has some very good mines within its own borders. These, it is reported, are doing their best to meet demands, but in one instance, been unable to get cars. There is no further difficulty about transportation; they should be able to look after Alberta and Saskatchewan and the western half of Manitoba. Winnipeg, however, has partly arrived at Fort William and Port Arthur where there are at present some 75,000 tons of hard coal. Another 75,000 are expected to be brought in before navigation closes. Winnipeg coal sellers, however, complain that the public are not reporting them, and state that no orders are coming in. They are unable to gauge the requirements for the winter, which will be much greater than in former years because many people in consequence of the high price of wood are intending to use coal instead.

Wood certainly is going to be very scarce and very dear. The price of snow of last winter greatly interrupted operations in the north and curtailed the output of the camp and forests. That apart from this phase of the question, the railways are concentrating the difficulties of procuring wood, as Winnipeg merchants, who have had such in the woods all the summer claim that they are unable to obtain cars. The companies operating the company on this ground are widespread even this early in the season, consequently those dependent upon that wood for supply have reason to view with alarm the prospects with the really heavy season approaching. Consequently, it is expected that the coal market will be of particular interest to Winnipeg where the consumption is so heavy. It is estimated that at least 150,000

200,000 cords are required for the season, or in the neighborhood of one hundred cars per day. Yet according to a statement prepared by the inspector under direction of council or a basis of action there are only 3,500 cords of wood now in the city with 25,000 cords at country points waiting transportation. This makes the visible supply in territory likely to be shipped to Winnipeg, in large proportion of this will be distributed through country points.

The Canadian Northern report that there are not 20,000 cords of wood at the track between the city and Port Arthur, which is borne out by an article with S. J. Youill, of Rainy River, an Winnipeg. He estimates that there are 6,000 cords at Rainy River and 10,000 at Woodbridge. From the last mentioned place to Rainy River there are, he believes, 200 cords. This is a really serious situation.

At the Head of the Lakes.

The supply of coal at the head of the lakes is one of the most vital elements of the entire fuel situation, and while the Free Press through its correspondents has been able to give a fairly accurate picture of the receipts there, nothing detailed can be obtained from the T. H. officers of the company is a section of this information about 4002 refuse to give it to the public at reasons which are not apparent to a casual observer. It is known, however, that stocks are considerable, and that the current fuel supply is being increased by the close of navigation there will be nearly a million tons of a brace and aluminum coal in the lakes at the head of the lakes in the Canadian Northern.

Output at Western Mines.

The mines in Western Canada have all that they will be able to supply the demands of the new provinces, notwithstanding the great output of their aggregate output. The Crow's Nest coals have at present a daily output of 8,000 tons, most of which is absorbed by the railways, and the manufacturers, as soon as the snow is in the making of coke for the smelter use, so that a very small balance remains to take the domestic needs of the Canadian Northern. The company has a contract with the Crow's Nest Coal Company, cannot get supplied, and exactly any coal is available for storage along their lines they rely upon Pittsburg.

The Canada west mines at Taber are producing 350 tons a day; and the Alberta mines at Lethbridge are producing 400 tons a day. The mining about 700 and the coal being taken as fast as it is produced by orders in the provinces. Naturally, general manager, says that supply is all right.

The mines are working every day, a great demand, and the output will be maintained no more, men can be hired, the scarcity of labor being the only thing to be possible. At 1,200 a day. These, with the smaller mines should turn out 500 tons a day. Backhead's present production is 100 tons, but it has a capacity of 1,000, including bringing the Southcliffe (dip) can run out 400 to 500 tons a day. The mine at Edmonton are shipping five to six cars a day, which would be about 100 tons. H. M. Morris, of Monville, says his mine is undergoing improvements to increase its output, and believes that he has come upon a storable lignite. They look for a dozen mines to be in operation all or less developing. It is a fact that along the coast the rate of coal is being stored at the rate of 1,000 to 1,500 tons a day and before winter sets in there will be close on 100,000 tons in stock the Saskatchewan government is thinking a commendable interest in the production of a supply for that province and has made arrangements whereby local dealers will be able to get coal on credit from the various companies, and the railways have undertaken to supply coal to facilitate the building up of stocks. There is also an intention to operate mine for the benefit of settlers, but this can hardly be of much service in the coming winter. The coal requirement in the new provinces has grown considerably. It is estimated to be 50 per cent more.

Views of Dealers.

Scarcity of Wood Means High Prices. The Winnipeg dealers of coal expected the Winnipeg dealers have varied their opinions upon the fuel situation, and while some are optimistic, a Free Press representative, W. J. Boyd, of Winnipeg, says: "Coal has been coming up the lake very slowly, on account of the scarcity of boats. It has been impossible to get them. We have a very small stock, and it is impossible to get them. The Canadian Pacific has a double capacity of their docks at Fort William and they expect to be in a position to take shipments in about a week. As soon as their docks are ready, I expect the movement will become rapid. Owing to last year's experience, they have been so well prepared for demand for coal all round the lake, and it seems to have been difficult for the producing companies to satisfy their requirements. We hope to have, before winter closes, enough to take care of our trade local inquiries for coal, however, are not numerous."

UPPER CANADA COLLEGE TORONTO

Admission from August 15th to September 1st. The Registrar's Office is located in the building of the University of Toronto, 270 Bloor Street West, Toronto. For further information, apply to the Registrar's Office. The Registrar's Office is located in the building of the University of Toronto, 270 Bloor Street West, Toronto. For further information, apply to the Registrar's Office.

D. E. Adams, of Winnipeg, said: "Wood is scarce and high. There is very little more wood available in the territory of the province with the line of the railway. It looks to me that the public would have to take care themselves to use soft coal, which we are putting in an extensive supply to take care of the demand."

There is considerable activity among the mines in the west, and as the labor troubles are over, it is expected that they will be able to take care of the requirements of the new provinces. As a matter of fact there is a little coal shipped to them from Fort William; and on the other hand, very little of the output of the western mines comes to Winnipeg. We have to rely upon Pennsylvania coal. The Canadian Northern are intending toward all the cars we have asked for in response. We have had a good deal of wood off their lines within the last month. The word is that P.R. is a statement prepared by the inspector under direction of council or a basis of action there are only 3,500 cords of wood now in the city with 25,000 cords at country points waiting transportation. This makes the visible supply in territory likely to be shipped to Winnipeg, in large proportion of this will be distributed through country points.

Shipping Outlets.

The Western Coal Company also stated that it had been difficult to get coal shipped from Buffalo to Fort

William. They had, however, nearly closed shipping from the lake. H. M. Morris, of Monville, says his mine is undergoing improvements to increase its output, and believes that he has come upon a storable lignite. They look for a dozen mines to be in operation all or less developing. It is a fact that along the coast the rate of coal is being stored at the rate of 1,000 to 1,500 tons a day and before winter sets in there will be close on 100,000 tons in stock the Saskatchewan government is thinking a commendable interest in the production of a supply for that province and has made arrangements whereby local dealers will be able to get coal on credit from the various companies, and the railways have undertaken to supply coal to facilitate the building up of stocks. There is also an intention to operate mine for the benefit of settlers, but this can hardly be of much service in the coming winter. The coal requirement in the new provinces has grown considerably. It is estimated to be 50 per cent more.

Galt Mines Supply.

A. M. Kingston, managing director of the Galt mines, Lethbridge, was interviewed in his office in Main Street, Winnipeg, and said the output of the mines was 270 tons a day. "We have been doing," he proceeded, "a lot of development work and the capacity will be considerably over 1,000 tons. The difficulty now is the scarcity of labor. Only a limited amount of the coal comes into Winnipeg. The bulk goes to the western part of Manitoba, Saskatchewan and Alberta, and is used largely for domestic purposes. We supply local customers with Pennsylvania coal, and I think local dealers will be able to satisfy their requirements. The demand of the public, providing the public will accept by taking a large portion of their winter requirements during the summer. Many are doing this, in fact as the Galt coal is concerned, much of it is being stored at all the ship points in west."

LOCALS.

The public are asked to kindly note the fact that public worship in the Methodist Church Sunday evening is now held at 7:30, instead of 7 o'clock as formerly.

Thanksgiving day this year will be the last Thursday in October. Before this date is set by the government a deputation from the Commercial Travellers' Association will be sent with respect to their request that Thanksgiving Day be on a Monday.

An effort was being made yesterday by the commissioners to improve the condition of Nampayo avenue by hauling a number of loads of clay from Churchill street. These were dumped in the mud, which was temporarily made in a worse condition. It is thought there will be a great improvement when the clay is packed down.

Work on the furniture store being constructed by W. McKim, on Nampayo avenue is being pushed forward rapidly, and the building will be ready for occupancy in several weeks' time.

A portion will also be occupied by the east end branch of the Merchant Bank, now further down the street.

The Methodist, Presbyterian and Baptist congregations of the city have agreed, through their pastors, to cancel their respective prayer meeting appointments for Wednesday evening August 16th, and to join in a special meeting in the interest of the Bible Society in the First Baptist Church. The meeting will be addressed by the Rev. Jesse Gibson, associate permanent secretary of the United Canadian Bible Society, Toronto, Ontario.

DOESN'T WANT NOMINATION.

The impression prevails among a number of the ratepayers of the city and was frequently mentioned at last night's meeting, that W. D. McPhail, the East Jasper real estate man, was looking for the nomination for the vacant aldermanic seat. To the Bulletin this morning Mr. McPhail said emphatically that he has no idea of entering the field. He instead give all his support to the nominee of the meeting, Mr. Williams.

LUNCHEON FOR BRITISH JOURNALISTS.

Arrangements are being made for a Canadian Club luncheon to be given in the Albert Hotel on the occasion of the visit of the Canadian Journalists here. The date has not yet been definitely arranged, but will depend upon the convenience of the visitors.

LEDUC TELEPHONES.

A. J. Richards, provincial inspector of telephones, was in Leduc recently and informed The Representative that the provincial government had purchased the old local line to Edmonton, and would place it in proper repair at once. A business phone will cost \$24, and a house phone \$15, but it is the intention to lower these rates as soon as the revenue will permit. Over thirty business men were obtained as subscribers.

SOUTH COUNTRY CROPS GOOD.

Mr. McDonald, who is known throughout all Alberta as "Little Mac," is in Calgary, after an absence of four months. He has spent most of the time in organizing flour mills in Pincher Creek and other parts of the south. He is very enthusiastic over the crops in the south country. He is an old timer in Alberta, and one who has toured the country extensively, but he has never seen conditions looking as well as at present. This is particularly the case in the Pincher Creek district, though everything is looking well throughout the entire south country. Mr. McDonald says that a big crop is assured for Southern Alberta.

JIMMY PRUDEN'S BEARS.

Jimmy Pruden, son of Mr. James Pruden, of Lesser Slave Lake, is in the city with his father for a short time.

Jimmy, who is thirteen years old, was never in a city before, and he is somewhat shy of people and timorous of things, though he took right to the merry-go-round. But back to the woods, he is afraid of nothing. He killed more bears than any man in Lesser Slave Lake district last winter, and thinks it but a small feat.

In one day he trapped and killed four bears, and in the past three years, he killed thirty in all. He uses steel traps, and is rarely disappointed in his plans. He does not "trap bears," but lynx and other smaller animals as well. In all he earned about \$100 last winter for skins he sold.

SAD DEATH CAUSED BY A CEDAR SPLINTER.

The funeral takes place today of the late Mr. Priest of Belmont street, Edmonton, whose death has taken place in a distressing circumstance. Three months ago, to date Mr. and Mrs. Priest with a family of five children, left England for Canada. On arriving here at the end of May they stayed first at the Immigration Hall, where the eldest daughter was taken ill and removed to the hospital, eventually recovering. The husband, being unable to find time to get any other work, was occasionally laboring. Mr. Priest worked hard to support the family, resources by going out to work at different places and it was while engaged at a lady's house she unfortunately pierced her thumb with a cedar splinter, which resulted in blood poisoning, terminating with fatal results after a three weeks' illness.

PERSONAL.

Mr. H. Bishop, of Winnipeg, is visiting his son in the city on his way home. He is accompanied by Mr. Hanson.

Mr. A. H. Edwards of Ottawa, accompanied by his wife, is in Winnipeg on his way to Vancouver. Mr. Edwards is a well known lumberman and brother of Senator Edwards.

Mr. J. M. Church, manager of Union Bank, Meriville, Ont., is spending a few days with relatives in the city, while on a pleasure trip across the coast.

ADDITION TO S. A. BARRACKS.

The Selection Army have taken out a permit for a \$1,200 addition to their barracks on Fraser avenue, which will greatly increase its capacity. The work of construction will be done under the superintendence of W. W. Casey, travelling construction agent for the Army.

A permit was also issued this morning to W. B. Broadhead for a small building on Heimick to cost \$200.

THE NEW BAPTIST CHURCH.

A new Baptist Church has been started in the east end of the city. The Baptist board has purchased a most central building, corner of the Junction of Synagogue avenue and Morris street, where it is proposed, in the near future to erect a new building, which will be known as the Synagogue Avenue Baptist Church.

The Baptist board have presented the land free of cost to the new church as a stimulus to immediate action. The Sunday evening last, between 6 and 10 p.m., a large number of people were present to be enrolled on the charter roll of membership.

At the same time, a service was held in their names for immediate baptism with a view to membership. The services at present are being conducted in a large tent erected on the site, and the church and services are in charge of Pastor McCall, from Brandon College. The services which are being largely attended, are bright and helpful, and are held at 11 o'clock, Preacher, Pastor McCall. At 3 o'clock in the evening, the evening service is preceded by a prayer meeting, commencing at 10 o'clock. There is also a Sunday school at 3 o'clock, and men and women Bible classes, which are well attended, and a regular Wednesday evening prayer meeting and service at 7 o'clock.

Serving the large attendance, and the fact that the new church, which is to be erected on the site, is to be a large tent erected on the site, and the church and services are in charge of Pastor McCall, from Brandon College.

The outcome is that the new church will be long in building, and the fact that the new church, which is to be erected on the site, is to be a large tent erected on the site, and the church and services are in charge of Pastor McCall, from Brandon College.

The chapter roll will be kept open until the beginning of October when it is hoped that a large number of new members will be enrolled. Those who are members of distant Baptist churches or the Disciples Church, may have their names included on this charter roll, as pioneers of the new church.

A very hearty invitation is given to all near residents to the various services, school sessions, and a Women's Aid and Young People's Society will be held every week. Application for membership can be made at any of the services.

CHURCH SERVICES.

Baptist Church (First) north—Public worship at 11 a.m. and 7 p.m. The Rev. A. M. McDonald, pastor. Rev. Mr. McIntyre, of Pincher Creek, will conduct both services.
